

HOOK AND LINE KIT - COMPREHENSIVE

EOD KIT

Overview

NIC's Hook and Line systems feature a semi-remote rigging technique which facilitates safe entry into buildings and vehicles suspected to contain unexploded ordnance. Utilizing a high strength, low stretch line in conjunction with an extensive range of attachments, the systems allow EOD personnel to manipulate objects from a safe distance. We offer kits ranging from the 1st Generation - suited to basic EOD procedures or demining applications - to the Comprehensive - containing a full range of instruments for EOD & IED disposal tasks. The Comprehensive Hook & Line (HAL) advanced tool kit combines all the functional ability of the 2nd generation and 4th generation kits. It contains all the necessary tools to carry out hook and line procedures in buildings and on vehicles. Twin color coded reels are included, and the kit comes complete in a case fitted with a foam insert.
